

DEALERSHIP MANAGEMENT

explören

ex

OVERVIEW

Exploren is a **complete software solution** for your whole EV charging network. The diverse capabilities of the Exploren management platform will ensure your EV cars are always ready for a test drive.

With the Exploren platform you will be able to unlock the full potential of your EV chargers.

EV CHARGING MANAGEMENT & YOUR DEALERSHIP

With the adoption of electric vehicles expecting to more than double in the next five years, it is important to ensure your dealership is equipped with the infrastructure to support this change and sell more EVs.

The Exploren management platform will fully support your implementation of chargers. With the EV chargers working with Exploren, you will be future-proof to manage the electrification of vehicles in Australia.

FEATURES

WHY CHOOSE EXPLOREN

Data Collecting

With data collecting, you will have greater understanding of your EV charging network. This data will aid in making informed decisions to optimise the size, efficiency and energy usage of your chargers.

EV Charger Management

Receive live updates and notifications from your EV chargers. This will increase uptime across the network to ensure your staff have reliable access to their chargers and keep your vehicles fully charged.

Taffis/ User Billing

You can choose the cost of charging per kw/h charged to the users. Either simply offset the costs of energy used or generate a revenue stream with a higher.

At-a-glance Reporting

Get quick access to all the reporting you need. Find visual data on energy consumption, user behaviour and revenue etc. You can compare data from different periods, filter by criteria (e.g. type of charge point), the location, and more.

Local support

Exploren is Australian owned and hosted on Australian servers to provide fast speeds. We are compliant with all Australian data protection laws to ensure the safety of our users.
